

LEGEND PLATE ENGRAVING

Xpect Solutions, Inc. is your trusted online source for custom-engraved electrical panel labels and high-quality legend plates. With extensive experience in engineering and manufacturing, we deliver precision and reliability that set us apart.

What is a Plastic Legend Plate?

A plastic legend plate is a durable, engraved label designed to identify and organize controls, switches, buttons, and other equipment components. Commonly used in industrial, commercial, and workplace environments, these plates improve safety and efficiency by providing clear identification for equipment functions. Plastic legend plates are lightweight, corrosion-resistant, and customizable, making them ideal for applications such as control panels, emergency stop buttons, valve labeling, and machine data plates.

How to Purchase Plastic Legend Plates

With Xpect Solutions, you can easily order high-quality plastic legend plates designed to meet your exact needs.

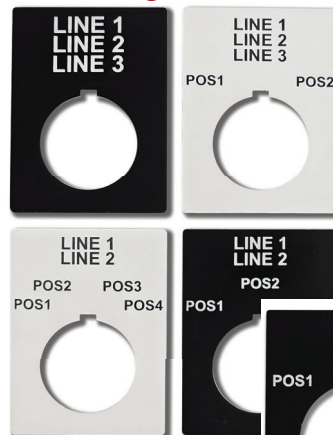

- **Choose from Standard Sizes:** Select plates to fit 22mm or 30mm control panel buttons or request a custom size.
- **Personalize with Text or Symbols:** Add custom engravings, including bilingual text or universal symbols, for enhanced communication.
- **Order Online:** Use a secure, user-friendly website to customize and request a quote for bulk or individual orders.

Request a quote and experience fast, reliable service!

Applications

- **22 mm Legend Plates** — designed to fit standard 22 mm selectors, push buttons, and indicator lamps
- **30 mm Legend Plates** — designed to fit standard 30 mm operators, selector switches, or pilot lights
- **Engraved Labels and Nameplates** — personalize your text, choose from a variety of colors, create custom sizes
- **Engraved Tags for All Applications** — tags for industrial, commercial, or non-commercial uses
- **Emergency Stop Legend Plates** — improve safety and compliance in your workplace
- **Custom Legend Plates** — clearly identify buttons, switches, and other controls on equipment and machinery
